Liya & Family
Free learning. Shared possibility.

PRESCHOOL THROUGH GRADE 6

Small steps. Bright futures.

A free place to practice Math, Reading, and Science, with a grown-up nearby when needed.

What your family gets

96 lessons across eight levels: 12 per level, with four in each subject. Every lesson includes an explanation, a worked example, an off-screen activity, and practice with answer feedback.

Start without an account

Choose a comfortable level. Try one short lesson, talk about it, and return when your family has time. No payment, ads, chat, or required child names.

A few weeks of practice - with honest limits

Try one lesson per subject each week for a four-week path. This is a supplement, not a full school-year curriculum, diagnosis, or live tutoring service. Preschool and kindergarten need adult help.

See progress on the learning device

Up to four local learner profiles. Print a weekly parent report. Progress stays in that browser; automatic phone-to-phone access is not available.
